Re: Healthy Schools Act of 2000 (AB 2260)

The Healthy Schools Act of 2000 requires that all schools provide parents or guardians of students, and staff with annual written notification of expected pesticide use on school sites. The notification must identify the active ingredients in each pesticide product and must include the Internet address (<http://www.cdpr.ca.gov>) for further information on pesticides and their alternatives.

The following is a list of pesticides and the dates that pesticide applications **may occur** at any of the Santa Cruz City Schools District school sites from 8/1/2023 through 8/20/2024.

Except for emergencies or where exempted, all school sites will be treated on non-school days (weekends, student and staff holidays). Sites will be treated only where needed and when needed as determined by the severity of the pest problem. This letter and application schedule constitutes the individual 72 hour minimum notice for the pesticide control program on school district property as outlined in the Healthy Schools Act of 2000. Sites will additionally be posted with permanent application schedules at school entrance locations and where applications are being performed.

If you have any questions or require further clarification, please call Facility Services at 831-429-3904.

The following list of pesticides may be used at any of the schools in the Santa Cruz City School District.
